

## Tiger Class: Summer 1 Lost and Found

Welcome back! I hope you have all had a lovely Easter and enjoyed plenty of chocolate. The diet starts as soon as all the chocolate has gone!

This half term our topic is Lost and Found. We will be thinking about different places from around the world and learning about new species of animals and animals that are no longer around.

### Mathematics

This half term Year 1 and 2 will start by learning about positional language and direction. We will then move on to learn about time telling. This is a very complex thing to learn so we will be focussing on telling the time to the hour, half hour and for those that are ready quarter to and past.

The children will then be consolidating much of their learning through some problem solving. We will also continue to build the children's fluency with numbers and calculation, looking to find the most efficient way of working.

### English

In Tiger class the children will be continuing to build their understanding and fluency in both reading and writing. This will be linked to their group's phonic books although any and all opportunities to get them reading and writing are great. So please get them helping with the shopping lists etc.

They will continue to bring home their Read Write Inc books (Phonic books). These are books they have read in class and bring home to read to you. This is an opportunity to really celebrate all the hard work they have been putting in at school. Please encourage them to 'Fred out' any words they aren't sure about. They will be sent a new one of these each week once we have completed it in school. They are still welcome to bring home books of their own choosing.

**Please feel free to come and change your child's reading book; they are just inside the classroom door.**

### Science

In science the children will explore and compare the differences between things that are living, dead, and things that have never been alive. I am hoping we will get to do lots of planting outside and observing different seeds as they grow. The children will learn how to identify and describe the basic

### Geography

In Geography the children will be creating and filling out their very own passport as we travel to each of the 7 continents. As we travel to each continent we will learn about some of the human and physical features we might find with a little focus around food and culture. The children will then begin to research the 5 oceans and learn to locate and name them.

### Physical Education

PE will be on a Friday afternoon this term so please ensure children come into school dressed in their PE kit.

### PSHE

We are going to be learning all about ways to keep ourselves safe whilst using the internet. We will discuss personal information and passwords.

### Design Technology

The children will be learning the process of designing, making and then evaluating products. They will look at some simple mechanisms to include in their designs.

### Religious Education

This half term the children will be learning about Judaism. The children will ask the question 'How do Jewish people demonstrate their faith'.
